

FREESTYLE SCOOTERING

Freestyle scooting is a sport discipline. It is about doing good tricks. The terminology is similar as in BMX(biking). You can do freestyle scooting almost everywhere. You need a good surface to scooter on. A scooter does not work on sand for example. Usually it is younger people who do freestyle scooting.

I do freestyle scooting too. I have been doing it for only 7 months. The brand of my scooter is District, it is a French brand. I think that freestyle scooting is easier than skating or BMX.

You can buy a freestyle scooter at výstaviště in the Gizmania shop. Gizmania was the first scooter shop in Europe. My scooter is from Gizmania too. My scooter cost 6000 crowns. One of the best Czech scooter-riders is Petr Macháček. His scooter costs about 13 000 crowns.

gizmania

There are a lot of components for freestyle scooter. Pegs are components that you can put on or put off the scooter. They are used for grinding.

Some Tricks:

Tel vip – you jump and turn the deck around

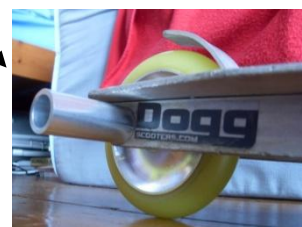

Bar spin –you jump and turn the handlebars around

Bunny hop - a simple jump

Grind – Slide

Back\Front flip – you jump and rotate with your whole body and with the scooter in the air backwards

Front Bree – it is hard ☺

My scooter:

I have my scooter 3 months. The brand of them is district. It is much funny.

My desk is district, bars, grips and brake, but my sleeve is French ID and wheels are MGP.

Some brand :
